DNP reinvents the concept of microlab.

The DS820DX printer stands out indisputable as the most complete in its category.

Combines all the qualities of sublimation printing, with new innovations: horizontal and vertical cutting as well as a crease function. Combined with double-sided printing, these new features offer an impressive array of possibilities. From simple printing to enlargements, photo albums, greeting cards or brochures, the DS820DX is the image of universality. Its large range of features and space saving design allows for easy integration and configuration.

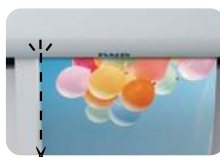

Double-Sided

Manage all types of photo printing jobs

Vertical cut

Allows a large assortment of print sizes

Crease function

Add folding lines for a professional finish to photo albums and brochures

DS820DX

2 different media options, 48 formats possibles

A wide variety of printing in one printer
